

## Thermo-12® Gold

### PIPE & BLOCK INSULATION

#### DESCRIPTION

Thermo-12 Gold is a pre-formed, high temperature, abuse-resistant pipe and block insulation with exceptional structural strength, composed of hydrous calcium silicate for use on systems operating up to 1200°F (649°C). It is inorganic, noncombustible, asbestos-free and meets or exceeds the physical and thermal property requirements of ASTM C533, Type 1. Integral to Thermo-12 Gold is, **XOX** a distinctive formula and process that inhibits corrosion to outside surfaces of pipe and equipment.

#### ADVANTAGES

- **Guards pipe and equipment** surfaces against corrosion
- **Excellent resistance** to breakage and physical abuse
- **No organic binders to burn out**; No loss of insulation integrity.
- **Excellent thermal performance** to 1200°F
- **Superior thermal performance** from 450°F to 1200°F
- **Resistant** to mold growth
- **Fast, easy installation**
- **Large selection** of sizes and forms

#### APPLICATIONS

Because of its low thermal conductivity, durability, compressive strength and corrosion inhibiting properties, it is the preferred product for application on high temperature piping and equipment. Thermo-12 Gold is especially recommended for use in the petrochemical, power generation and process industries where piping and equipment operating up to 1200°F (649°C). The **XOX** corrosion inhibiting properties are not diminished by heating and cooling so the corrosion protection will continue for the life of the product. Thermo-12 Gold will not burn and may be used for fire protection in some applications. Please e-mail [info@iig-llc.com](mailto:info@iig-llc.com) for specific application information.
